

## BEST BARS TORNADO P300 PALLET WRAP MACHINE CASE STUDY

**Best Bars reduces stretch film consumption and improves the sustainability of transporting pallets of towbars and automotive accessories.**

When Duane Murphy, Logistics Manager for Best Bars went searching for a new Pallet Wrap Machine, it was a welcome surprise to learn how much plastic film waste and pallet wrap costs could be saved by investing in the new **Tornado P300** Pallet Wrap Machine.

Through a detailed RLB onsite Packaging Audit of their current stretch wrapping practices, RLB were able to measure the previous stretch film performance, understand how much plastic film was being used on each pallet and accurately determine how much plastic waste could be removed from the waste stream.

The solution was investing in the new **Tornado P300** pallet wrap machine which boasts an easy to use LCD Touch Screen Control Panel and equipped with a motorised **Power Pre-stretch** and precise film tension control system, guarantees users optimal film usage and lowest cost per pallet wrapped!

After clearly demonstrating a significant 8.2 Tonne annual plastic waste reduction, 1 Tonne cardboard waste reduction and 67% lower stretch film spend the decision to re-invest in a new Pallet Wrap machine that had an attractive 3.5 month payback was easy. If you would like to receive a complimentary RLB stretch film packaging audit or learn more about how the Tornado P300 pallet wrapper can benefit your business please get in contact with RLB Packaging today.
